Hepasol DS

Powerful Liver Tonic for Poultry Birds

Contains high power extracts of Silymarin, Liquorice, Tricholine Citrate, Thiamine, Cyanocobalamin - B12 Biotin, Riboflavin, Niacin, Sorbitol, Biotin, Methyl Donors & Methionine.

Dose - 1ml per liter water for general liver health, 2.5ml per liter of water during toxicity & hepatitis. 1ml / 5kg B.Wt in IBH & FLKS/FLHS.

Benefits - Reduce fatty liver conditions, increase detoxification power of liver, improves hepatocyte functioning, silymarin works excellent in toxicity, increase feed intake, reduce FCR, supportive therapy in fatty liver (FLKS/FLHS), IBH and toxicity.

Nephrowin

Poultry Kidney Flusher Tonic

Poultry kidneys are not as efficient as other animals, they stick to body wall and most of the nephrons are of primitive reptilian types. These kidneys are efficient for uric acid excretion but uric acid remains quite insoluble & pose some problems when high protein diets are given. Nephrowin helps in flushing uric acid and other toxins from the body.

Dose - 1-2ml/liter water in kidney swelling & nephrosis or in less water intake & 1ml per 100 chicks during brooding.

Benefits - Helpful in preventing kidney damage during E.coli septicemia & infections like IBH & IBD, toxicity, prevent gout development, reduce chances of baby chick nephropathy.

Nexamune

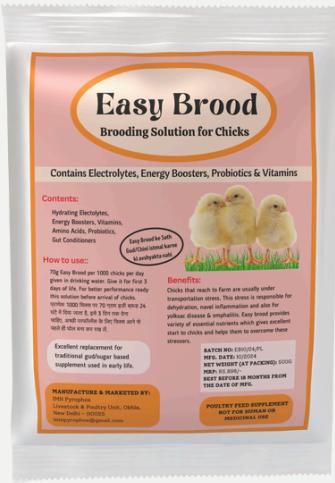

Immune Booster as Complete Armour of Immunity

Potent combination of Vitamin E, Se, Amla, Tulsi Ashwagandha extracts, Vitamin C, Vitamin D & Niacin. This combination in desired dose makes a complete anti-oxidant armour in the body.

Dose - 1ml per liter water or 15ml per 100 birds to boost immunity & to relieve stress, 25ml to 30ml per 100 birds during viral outbreaks, 2ml per liter of water before & after vaccination.

Benefits - Builds strong immunity, support immune system in viral outbreaks like Gumboro, IBH, ND, IB & LPAI, reduces severity of CRD and other respiratory diseases, immune boosting effects in vaccinations, reduce chances of vaccination failure

Easy Brood

Brooding Solution for Chicks

Hydrating electrolytes, osmolytes, energy boosters, vitamins, amino acids, probiotics and gut conditioners makes EASY BROOD an excellent startup supplement for your chicks.

Dose - 3 to 4 gram per liter of drinking water for first 72 hours after arrival of chicks. Better to give fresh solution every 8 hour.

Benefits - Reduces transportation stress in chicks, replaces traditional jaggery/salt based solution, enhances body hydration & water consumption, decrease chances of yolk sac infection, early navel healing & yolk dissolution.

Remipro

Probiotics & Prebiotics with Antioxidants

REMIPRO is a synbiotic (probiotic+prebiotic) blend formulated for poultry gut health, that rejuvenates gut microbiology which helps in better digestion & absorption of nutrients from the feed.

Dose - 1g/liter water for better intestinal health & feed absorption, 2g/liter water during enteritis, coccidiosis & clostridia infections.

Benefits - Act as gut conditioner, restore normal gut microflora after antibiotic treatment, reduce incidences of loose droppings, fights coccidia & necrotic enteritis, improves digestion and reduces FCR, correction of brown/coffee color droppings, helpful in prolapse in layers.

Septima

Effective Herbal Combo for Sepsis & Diarrhea

Intestinal sepsis & diarrhea in poultry is a multifactorial problem which mainly arises due to poor feed ingredients quality, litter eating due to any reason, contaminated water supply etc. Septima reduces intestinal infections & associated septicemia.

Dose - 1g/5Kg body weight of 2g/liter water in severe infections, 1g per 120 chicks in brooding.

Benefits - Beneficial in sudden mortality due to Intestinal Spirochaetes, Clostridium, Salmonella & E.coli infections, prevention of early chick mortality, preventing loose droppings (use once before Remipro for better results), works in secondary bacterial Infections.

Respoze

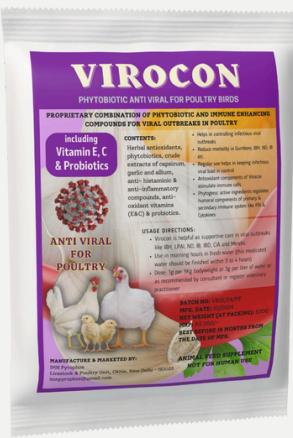

Effective Solution for Sound in Poultry Birds

Respiratory sounds in poultry birds is very serious problem encountered in day to day operations. RESPOZE contains herbal extracts of mint, ginger, mulethi and mucolytic agents. All these things reduces mucosal response in the air passage & clear it.

Dose - 1ml per 5Kg bodyweight or 2ml per liter of water for 3 days.

Benefits - Control effectively the respiratory sound problem in poultry birds, increase potency of antibiotics in respiratory bacterial infections by increasing the reach of antibiotics, helps in early recovery during CRD and work synergistically with antibacterial & antimycoplasmal drugs.

Virocon

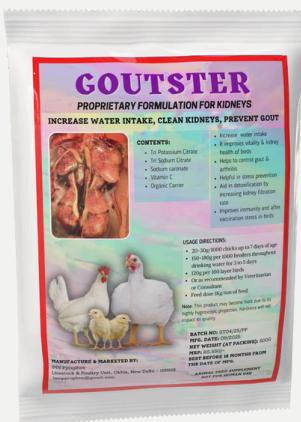

Phytobiotic Anti Viral for Poultry Birds

Phytonic active ingredients comes from shallots, garlic & capsicum extracts, are proved useful against many viral problems of poultry like IBH, IB, Gumboro & ND viruses. Managing primary immune response through VIROCON is helpful in controlling mortality during various infections.

Dose - 1g per 5Kg bodyweight or 2g per liter of water.

Benefits - Virocon is helpful in reducing mortality during viral outbreaks like IBH, LPAI, ND, IB, IBD & CIA, reduces vaccination stress, phytonic active ingredients regulates humoral components of primary & secondary immune system like IFN & Cytokines

Goutster

Anti Gout Combination for Poultry

An overload of the kidney leads to organ dysfunction with precipitation of insoluble products within the kidney itself or other organs such as urate deposits (gout) or urolithiasis. Goutster helps against such nephrotoxic conditions.

Dose - 20g/1000 chicks, 15 -20g per 100 birds throughout drinking water for 3 to 5 days

Benefits - Increase water intake and efficiency of kidneys. Solubilize uric acid to filter out from body during high protein metabolism like in pre-starter feed, helpful in Astrovirus (avian nephritis) & oosporein (mycotoxin) induced gout.

Egg Up

Ovary Stimulator & Egg Production Booster

Normal egg laying cycle of hens depends upon 2 factors first on hormonal balance and second on nutrient flux. Any descrepancy in above inputs may lower down egg production (in the absence of obvious infection). EGG UP works regulate both the factors precisely through its natural phytogenic components.

Dose - 20ml per 100 birds for 3-5 days.

Benefits - Increases egg production, reduce egg breakage %, decreased eggshell deformation, optimize egg size, reduce chances of fatty liver during high production or in stress conditions, lower down FCR.

Pyrocal B

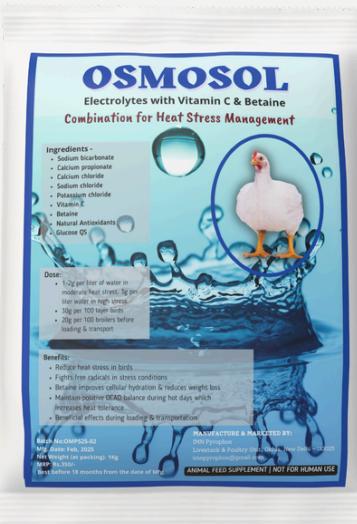

Calcium, Phosphorus, Trace Minerals & B Complex

Liquid calcium phosphorus supplementation which is loaded with 7 essential trace minerals viz. chromium, zinc, copper, iodine, selenium, manganese & iron. Along with this B complex vitamins like B1, B3, B6 & folic acid provides additional growth support. This formula is known to bring uniformity in flock.

Dose - 3ml per liter of water or 40ml per 100 birds.

Benefits - Provide supplemental ionic calcium & phosphorus, reduce chances of lameness, improves egg production, useful during weakness, increase muscular strength. B complex vitamins & minerals increases metabolism and weight gain.

OSMOSOL

Glucose, Electrolyte, Vitamin C & Betaine Combination

Heat stress is major constrain in poultry production in sub tropical countries like India. Osmosol helps in reliving heat stress with its unique electrolyte combination along with vitamin C and betaine.

Dose - 1-2g per liter of water in moderate heat stress. 3g per liter water in high stress. 20g per 100 broilers before loading & transportation, 30g per 100 layer birds.

Benefits - Reduce heat stress in birds, betaine improves cellular hydration & reduces weight loss, maintain positive DCAD balance during hot days which increases heat tolerance, beneficial effects during loading & transportation.

Sel E Boost

Vitamin E and Selenium Combination

Vitamin E and Selenium is time tested stress alleviator in poultry and use to reduce oxidative stress developed due to variety of reasons. It is usually recommended in various unidentified problems. It is known to increase activity of heterophils.

Dose - 1-2g per liter of water.

Benefits - Reduce oxidative stress, useful during cage transfer and transportation of pullets, reduce chances of vaccination failure, beneficial effects during brooding, increases immune cells capacity to fight infection during outbreaks.

Grotek

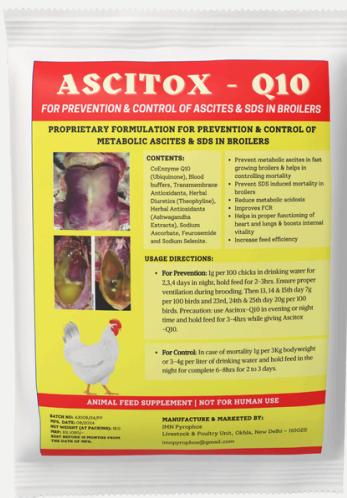

Weight Gainer for Poultry Birds

Contains multi B complex vitamins & minerals that reduces metabolic load on birds and make them more active and healthy, improves cellular anti-oxidant system which relieves oxidative stress. The underline concept of GROTEK is that it sensitizes the satiety center in the bird's brain & slow down it, so that bird's feed intake increases. It increases weight gain.

Dose - 1g per 5Kg bodyweight or 2g per liter of water.

Benefits - Improved feed intake, reduce FCR, increase growth rates especially in summers, makes birds more fluffy and shiny, maintaining weight during infections & recover weight after infection, improves weight in underweight layers and pullets.

Ascitox Q10

Solution for Ascites in Broiler Poultry

Ascitox - Q10 is a proprietary formulation made to be used in therapeutic management of ascites in fast growing broilers especially in winter season. If use properly as per instructions, Ascitox - Q10 can check ascites induced mortality within 36-48hrs in up to 85% of the cases.

Dose - 20g/1000 chicks, 3-4g per liter of water in the night time drinking water for 3 to 5 days. Hold feed while administering.

Benefits - Prevent metabolic ascites in fast growing broilers & helps in controlling mortality, reduce SDS induced mortality in broilers, reduce metabolic acidosis, helps in proper functioning of heart and lungs & boosts internal vitality.

SANITROM

Triple Action Biosecurity Sanitizer

Sanitrom is an excellent water cleaning sanitizer which works on 3 fronts. It cleans water by destroying harmful pathogens, reduces biofilm formation and minimum chemical residue. It is also recommended for farm cleaning, pipeline cleaning & fogging.

Dose - 1ml per 3-4 liter of water directly into the water tank, biofilm removal - 300ml per 4liter water, fogging - 100ml / 4lit water.

Benefits - Reduces microbial count in drinking water, prevents mineral build up in pipelines, can be given along with other medicines & supplement, can be given continuously.

ALCAEU

Herbal Antimicrobial Formula for Prevention

Phytonic extracts of onion, garlic, tulsi, cinnamon etc are used to make ALCAEU in dextrose carrier. Allicin (diallylthiosulfinate) reacts with thiol groups and can inactivate essential bacterial enzymes (like DNA gyrase). Synergistic combination of above along with other molecules provides wide anti-microbial window against various poultry infections.

Dose - 1g per 5Kg bodyweight or 2g per liter of water.

Benefits - Prevents early chick mortality during brooding (1st to 7th day), helps in yolk dissolution by reducing infection & fights E.coli, reduces respiratory infection complex like RDC & CRD.

COOLANT

Ultimate Heat Stroke Solution for Poultry Birds

Coolant is especially designed product for heat stress and heat stroke induced mortality, which protects birds from heat. It contains betaine as strong osmolyte which prevents cellular dehydration, electrolytes which maintain body fluid volume, HSP stimulators, tocopherols & vitamin c which act as strong antioxidants.

Dose - 1-1.5g/liter water in moderate heat stress or 2-3g/liter water in heat stroke mortality.

Benefits - Helps in preventing heat stroke, improves body hydration and prevent weight loss due to heat stress, provides energy to birds during hot afternoon hours when feed is on hold, helps in crossing 2Kg body weight in hot summers, recommended before loading for mandi.

Coxi-Eraze

Coxi-Eraze - Smart Protection Against Coccidiosis

Coccidiosis is a persistent challenge in poultry, causing recurring infections and significant losses. Coxi-Eraze provides a reliable, cost-effective solution by targeting both vegetative and non-vegetative stages. It reduces infection rates, strengthens gut health, and ensures healthier, more productive flocks, helping farmers achieve greater profitability.

Dose - 1ml per liter of drinking water for prevention for 3 days on every 10 days. 1ml per 4kg body weight for treatment purpose.

Benefits - Coxi-Eraze reduces coccidial infections, controls red and orange droppings, improves gut health, enhances immunity, boosts growth and egg production, lowers FCR, ensures flock uniformity.

Carnitek - F

Care Beyond Mycotoxin Binders

Carnitek-F goes beyond conventional mycotoxin binders, offering vital liver and organ support to counter hidden damage from multiple toxins. By enhancing detoxification, immunity, and growth performance, it helps poultry maintain health, resilience, and productivity, ensuring farmers achieve better results even under mycotoxin challenges.

Dose - 15ml per 100 birds as liver and kidney tonic, 25-30ml per 100 birds for toxicity recovery..

Benefits - Carnitek-F protects poultry against hidden mycotoxin damage, supports liver health, boosts immunity, reduces stress, enhances detoxification, improves growth and FCR.

AmmoBond

Binds Ammonia in Litter Effectively

Ammobond is a poultry litter ammonia binder that combats the harmful effects of elevated ammonia levels, which irritate birds' respiratory systems, reduce growth and feed efficiency, and promote disease. It works by chemically binding free ammonia in litter, transforming it into inert compounds, thereby reducing airborne ammonia and maintaining healthier shed conditions.

Dose - 5Kg ammobond spread over litter by broadcast method after 10 days of age for 2500 birds. Spread again after 21 days if req.

Benefits - By using Ammobond, poultry farms enjoy cleaner air, fewer respiratory issues, improved bird performance, enhanced feed conversion, better litter management, and overall healthier flocks with reduced mortality and cost.

Fly Raze

ECO-FRIENDLY FLY & MOSQUITO CONTROL

Flyraze is a natural, eco-friendly fly and mosquito repellent for poultry farms. Flies & mosquitoes spread disease, causes stress in poultry, and lower hygiene, but Flyraze's citronella-based essential oils mask odors, creating an environment that repels flies safely and effectively.

Dose - 30ml per liter of water spray in poultry environment on 250sqft carpet area, It should spread on curtains, litter, walls and boundary walls. It can be used in presence of poultry.

Benefits - Flyraze provides cleaner surroundings, healthier animals, reduced stress, and a fresher farm atmosphere, ensuring comfort for livestock and workers while supporting eco-friendly, chemical-free, and sustainable farming practices.

Vitaden H

Multivitamin which contains 7 vitamins

Vitaden-H is a specially formulated poultry multivitamin supplement enriched with vital vitamins like A, D3, E, C, Niacin, Biotin and B12. In poultry farming, birds often face stress, infections, and growth challenges due to nutritional deficiencies. By balancing essential vitamins, it ensures better health, faster growth, and improved overall productivity in flocks.

Dose - 1ml per liter of water.

Benefits - Regular use of Vitaden-H in poultry results in stronger disease resistance, higher egg quality, better feed conversion, reduced mortality, and high performing healthier birds, more profitable farming.

Vit - A - Zn

For weak and underweight chicks & poultry

Vitamin A and Zinc are vital for chicks as they promote rapid growth, strong bones, healthy feathers, and better immunity. Together they protect against infections, improve digestion, enhance vitality, and help weak chicks develop into healthier, more productive birds.

Dose - 1ml/liter water for chicks & broiler and 2ml per liter water in layer birds during bleeding in eggs.

Benefits - Supplementing Vit-A-Zn in chicks brings multiple benefits including stronger immunity, faster growth, healthier bones, improved feathering, better digestion, enhanced vision, stronger resistance to stress and diseases, and overall higher survival with better long-term productivity.

IMN Pyrophos Poultry Product Range With Dose & Packing Size

| S.No. | Product | Use | Dose | Packing |
|-------|-------------|--|-------------------------|---------------|
| 1 | Alcaeau | CRD, E.coli, chick mortality, infective lameness | 1-2g per liter water | 500g |
| 2 | Easy Brood | Relives stress & dehydration in brooding | 3 -4 gram per liter | 500g |
| 3 | Egg Up | Increase egg production, reduce broken shell | 20ml per 100 birds | 1,5 & 20Lit |
| 4 | Goutster | Gout, increase water intake, kidney swelling | 15 -20g per 100 birds | 500g |
| 5 | Grotek | Growth promoter, increase feed intake | 1g per 5kg b.wt | 500g |
| 6 | Nexamune | Immune booster, IBD, IBH, toxicity | 1-2ml per liter water | 1 & 5Lit |
| 7 | Hepasol DS | Liver tonic, IBH, fatty liver, toxicity | 1-2.5ml per liter water | 1,5 & 20Lit |
| 8 | Remipro | Probiotic, gut health, loose droppings | 2g per liter water | 500g |
| 9 | Respoze | CRD, sound problem | 1ml per 5kg b.wt | 500ml, 1lit |
| 10 | Septima | E.coli, loose droppings, necrotic enteritis | 1g per 5kg b.wt | 500g |
| 11 | Virocon | Ranikhet, IBD, IBH and other virals | 1g per 5kg b.wt | 500g |
| 12 | Ascitox-Q10 | Ascites, water belly, sudden death | 3-4g per liter of water | 1kg |
| 13 | Pyrocal B | Lameness, calcium, B vit & mineral deficiency | 3ml per liter of water | 1,5 & 20Lit |
| 14 | Coolant | Heat stroke mortality | 2-3g per liter of water | 1kg |
| 15 | Sel E Boost | Stress buster Vitamin E and Selenium | 1g per liter of water | 200g |
| 16 | Sanitrom | Water disinfectant, pipeline cleaner & fogging | 1ml per 3-4 liter water | 1 & 5Lit |
| 17 | Osmosol | Electrolyte Vitamin C & Betaine combination | 2-3g per liter water | 1kg |
| 18 | Nephrowin | Kidney flusher for nephrosis & kidney swelling | 1-2ml per liter water | 1,5 & 20Lit |
| 19 | Vitaden H | Multivitamin (Vit A,D,E,C, H,B3,B12) | 1ml per liter water | 0.5, 1 & 5Lit |
| 20 | Coxi-Eraze | Smart Protection Against Coccidiosis | 1ml per 4kg b.wt | 1L |
| 21 | Carnitek F | Use against toxicity, fatty liver & kidney problem | 1-2ml per liter water | 1L, 5L |
| 22 | AmmoBond | Binds ammonia in litter, reduce CRD symptoms | 5kg per 2500 birds | 5kg |
| 23 | Flyraze | Natural control of flies and mosquitoes | 30ml per L for spray | 1L |
| 24 | Vit-A-Zn | For underweight & weak chicks, layer birds | 1ml per L water | 0.5, 1L |

| | |
|-----------------------|---|
| ईंजी ब्रूड | नए चूजों में स्फूर्ति के लिए शुरू के 48 से 72 घंटे इस्तेमाल करें |
| नेग्जाम्यून | विटामिन ई, सिलेनियम आमला तुलसी अश्वगंधा आदि से निर्मित इम्यून बूस्टर |
| हीपासोल डी.एस | लिवर स्वास्थ की रक्षा के लिए शक्तिशाली तत्वों का कॉम्बिनेशन लिवर टॉनिक |
| रेमीप्रो (प्रोबिओटिक) | लूज़ ड्रोपिंग के लिए बीटेन, विटामिन सी के साथ लेकटोबैसिलस और बैसिलस रेस्पोज़ |
| बलगम | बलगम काटने वाले तत्वों से भरपूर जो साउंड प्रॉब्लम का करे निवारण |
| वायरोकौन | आई.बी.एच, एन.डी, आई.बी और अन्य वायरल बीमारियों का अचूक समाधान |
| एसीटोक्स क्यू 10 | ब्रायलर एसाईटिस (पेट में पानी) की समस्या के लिए एक कारगर इलाज |
| सैपटिमा | पोल्ट्री में ई.कोलाई आदि द्वारा सेष्टिक परिस्थितियों और दस्तों का इलाज |
| ग्रोटेक | एंटीबायोटिक ट्रीटमेंट के बाद झटक जाने वाली बड़स में ग्रोथ के लिये |
| गाउटस्टर | छोटे चूजों में गाउट और कम पानी उठाने की समस्या हेतु दिया जाता है |
| अलकायू | पोल्ट्री में योक डीज़ीज़, अर्ली मोर्टेलिटी और ई.कोलाई के लिए बेस्ट प्रोडक्ट |
| नेफ्रोविन | किडनी स्वेलिंग, नेफोरोसिस और यूरिक एसिड की समस्या के लिए टॉनिक |
| एगअप | एलोवेरा और क्रोमियम युक्त ओवरी स्टीमूलेंट अंडा उत्पादन बढ़ाने के लिए |
| कूलैंट | हीट स्ट्रेस और हीट स्ट्रोक से होने वाली मोर्टेलिटी कंट्रोल करने में सक्षम |
| ओस्मोसोल | ग्लूकोस इलेक्ट्रोलाइट विटामिन सी कॉम्बिनेशन पोल्ट्री में स्ट्रेस कम करने हेतु |
| सैनीट्रोम | पानी को साफ़ करने के लिए आर्गेनिक सैनीटाईज़र ई.कोलाई नाशक |
| वीटाज़ीन | विटामिन ए जिंक सप्लीमेंट अंडरवेट चूजों और हाई ग्रोथ के लिए |
| वीटाडैन एच | विटामिन ए.डी.3.ई, बी12, एच, सी और नियासिन मल्टीविटामिन सप्लीमेंट |
| पाइरोकैल बी | लेमनैस और कैल्शियम की कमी में दिया जाने वाला टॉनिक |
| सैल-इ बूस्ट | एंटीस्ट्रेस 10% विटामिन इ और सेलेनियम |
| कॉक्सी इरेज़ | कोक्सीडीओसिस, लाल नारंगी बीट के लिए सटीक समाधान |
| अमोबौंड | लीटर से निकलने वाली अमोनिया को बांधकर फार्म में अमोनिया कम करता है |
| फ्लाइरेज़ | फार्म में पनपने वाले मच्छर मर्कियों का नेचुरल समाधान |
| कार्नीटिक एफ | टोक्सिसिटी, लीवर प्रॉब्लम से होने वाली मोर्टेलिटी को कम करता है |
